

Chink Shit General

July 2017

A buying guide for buying stupid shit from china

AllExpress Aliexpress is owned by the Alibaba Group, a huge fucking online shopping and e-commerce company. Aliexpress has everything you could possibly want or need. They have almost every item you can think of. They also have a ton of Chinese equivalents of Alix. Reviews on Aliexpress don't mean too much as Chinese sellers can just review and people don't leave 5-star reviews just for getting the item in the mail.	GearBest A relatively new (established 2014) technology-focused shopping site. Advances toward using Gearbest include their own shipping service, which is currently in beta. They also offer a 50-point scale for reviews so take the reviews with a grain of rice. Gearbest offers "ship證明" which is useless if you just use PayPal. Gearbest offers items like clothes and shoes but aren't garbage-tier. Gearbest owns warehouses in Spain, the US, Hong Kong and the EU. Typically has the lowest prices for the worst customer service.	ebay Ebay was originally made for collectors and a way for ordinary people to sell other people. This is why it's still around. It's great for getting things at a reasonable price. It's also been adopted by business-to-consumer sales. Ebay isn't the best place to get typical Chinese goods at the lowest prices but it's widely used by thousands of vendors and provides a large catalogue.	Banggood.com Banggood is a relatively old company that has a bunch of warehouses that they ship from. They have a point system that is similar to Gearbest's.
Taobao Taobao is owned by the Alibaba Group and is basically Chinese Ebay. The whole site is Chinese and all the products are in Chinese. Most of the time you will have to pay for international shipping from Taobao. You always have to pay for shipping to your country or an agent to do for you. Taobao is almost always used for weird gear or replica products.	DX dealExtreme DX is a relatively new (established 2014) technology-focused shopping site. DX is owned by Gearbest. They have a ton of items and are very cheap. They also have a ton of Chinese equivalents of Alix. Reviews on DX are mostly 5/5. Mainly Used for...Consumer Electronics & Knives	Digitate Digitate is another relatively new (established 2014) technology-focused shopping site. They have a ton of items and are very cheap. They also have a ton of Chinese equivalents of Alix. Reviews on DX are mostly 5/5. Mainly Used for...Everything & Second-Hand	FastTech FastTech has a huge selection of knives, vapes, lighters, and other EDC-esque goods. They have relatively fast shipping times to the Eastern U.S.
geekbuying Geekbuying is a relatively new (established 2014) technology-focused shopping site. They have a ton of items and are very cheap. They also have a ton of Chinese equivalents of Alix. Reviews on DX are mostly 5/5. Mainly Used for...Consumer Electronics?	iOffer Offer is an online marketplace where you can buy and sell practically anything. iOffer was founded in 2002 and is based in San Francisco, California. (taken from their About page)	GIZTOP Giztop is the official shop of Gizmochina. Gizmochina is a technical blog about products in China and elsewhere which includes smartphones, electronical gadgets, and everything else that comes under the genre. (taken from their About page)	iBuygou iBuygou was established in 2012 with exclusive focus on re-selling Xiaomi smartphones to European countries. (Buygou) has after sales support centers for customers overseas and also an EU warehouse. They have a ton of items and are very cheap. They have a house and branch office in Spain, Barcelona. To go further (Buygou) has also applied the QC and test reports for many of their products. It's a good place to buy from if you're interested in the latest products from Xiaomi and we have previously been invited to attend an annual product press conferences as well. (taken from their About page)

Frequently Asked Questions Q: How can I contact you? A: Email via brian@42oblaze.it or Windata#8428 on Discord	Changelog	*WIP*	Shipping	Where are the...
Q: Who is Jack Ma? A: Founder of Alibaba Group, which owns Aliexpress, Taobao and several other e-commerce websites.				
Q: Can I trust Alipay? A: Yes, Alibaba Group is a multi-national and multi-billion dollar company.				
Q: Who is the cartoon in the OP images? A: It is Xiaomi's mascot Mitu. It's meant to be a rabbit.				
Q: Can you add X? A: Shoot me an email.				
Q: Where is X on here? A: Hopefully I'll finish this before I fucking die				
Q: Are the prices accurate? A: The market is an enigma				

Smartphones beware of brand shills and baseless claims. Make sure to check device and carrier compatibility with websites like frequencycheck.com or willmyphonework.net/

Consumer Electronics this is a 'catch-all' section in which these items don't warrant having their own section.

USB SNES Controller (\$4) I hope it doesn't have a keylogger :)	Powerbanks (\$10-\$60) BlitzWolf BW-P2 3350mAh...\$10 Xiaomi 10000mAh Slim...\$20 Xiaomi 10000mAh Power Bank...\$23 V2Z Studio 8" (DIY)...\$60	Xiaomi Mi Band 2 (\$24-\$30) The Xiaomi Mi Band is a cheap waterproof fitness tracker that has a small screen and a touchpad. It also tracks sleep. Its sensors are not great for exercise because the built-in pedometer is sometimes inaccurate. It can be used as a watch face. It can connect to your phone, as it can vibrate and show notifications as well as act as a remote for your device. These radios are perfect for someone who wants to replace the stock antenna on their radio. If you've upgraded alternatives from Baofeng, but then you partly lost the original antenna, you can still use the one on the internet.	BaoFeng UV-5X3 (\$60) Baofeng makes dirt-cheap rugged radios. These radios are perfect for someone who wants to replace the stock antenna on their radio. If you've upgraded alternatives from Baofeng, but then you partly lost the original antenna, you can still use the one on the internet.	JJRC H22 (\$20) A cheap and beginner-friendly drone. It features: Headless mode (flies relative to remote). One key return. One key battery life. Poor factory calibration, but can be recalibrated.	XK Alien 250 (\$35) A sleek and cheap and beginner-friendly quadcopter. It features: Headless mode (flies relative to remote). One key return. One key battery life. It can be controlled with an FPV system for an additional \$5.	James Donkey 112S (\$11) A sleek and cheap and beginner-friendly quadcopter. It features: Headless mode (flies relative to remote). One key return. One key battery life. It can be controlled with an FPV system for an additional \$5.	
8Bitdo Bluetooth Controllers (\$9-\$45) It's a Hong Kong based company that makes high quality controllers for the Switch. They are generally perceived to be one of the best controllers on the market. Their cheaper controllers are typically very small.	Neteat N5305 SSD It shows up as a Microsoft mouse in linux	KingDian S280 SSD This is a pretty decent mid-range TLC SSD. It should be roughly the same price as the Crucial support warranty.	EXP GDC (\$40) The EXP GDC is a eGPU adapter that allows a user to use a full-sized graphics card on a laptop.	Jumper EZBook 3 PRO (\$250) Reviews... Windows 10 CPU...Intel i5-7200U Screen Size...13.3"	CHUWI Lapbook 14.1 (\$260) Reviews... Windows 10 CPU...Intel i5-7200U Screen Size...14.1"	OnePlus 3T (\$440) Reviews... OS...Android 6.0 CPU...Intel i5-7200U Screen Size...5.5"	Xiaomi Mi Mix (\$530-\$600) Reviews... OS...Android 6.0 CPU...Intel i5-7200U Screen Size...5.4"

Microphones & Audio Equipment shiptpost with your voice instead of your keyboard

Foam Microphone Windscreen (\$1) wrap your willy nilly before you get silly	Pop Filter (\$5-\$10) Pros: +dirt cheap Cons: -???	USB Soundcard (\$1-\$8) These are pretty common and often come with microphones, replace certain components on a computer, or introduce 3.5mm ports on a computer. Cheaper soundcards are often used to detect headphones due to faulty and cheapy components.	SF-920 (\$9-\$13) This is a deep cross-directional microphone that features built-in volume control and is almost always sold for a lower price than a higher quality microphone. Requires phantom power to operate.	Scissor Arm (\$11-\$20) Requires phantom power to operate.	BM-700/BM-800 (\$9-\$16) The BM-800 and BM-800s are one of the best budget microphones. They are cheap, modifiable condenser microphones. If you're a musician on a budget, seriously look into the BM-800. Microphones for TeamSpeak/VoiceOver/Discord will get bad microphones.	Generic 48V Phantom Power Supply (\$19) These are typically cheaper on Amazon and provide phantom power to almost all condenser microphones.	Orange Pi Single Board Computers
Generic Lapel Microphone (\$1) Pros: +dirt cheap Cons: -quality is hit or miss	Acoustic Foam (\$1-\$3 per sq ft.)	KingDian S280 SSD	EXP GDC (\$40)	M328 Digital Transistor Tester (\$13-\$21) you plug in components and the device shows information about those components.	YIHUA 908D (\$22-\$29) A cheap temperature controlled soldering iron with standby mode. Should be your first choice if you're a hobbyist or if you're a pro.	xDuoo X3 (\$507) A single board computer that runs off of a raspberry pi. It's a great alternative to the SBC computers if you're a hobbyist. It's the best distro to use.	
"Microfire" Intellimouse (\$32) It shows up as a Microsoft mouse in linux	8Bitdo Bluetooth Controllers (\$9-\$45)	Xiaomi Mi Band 2 (\$24-\$30)	BaoFeng UV-5X3 (\$60)	JJRC H22 (\$20)	XK Alien 250 (\$35)	James Donkey 112S (\$11)	Motobsped V30 (\$18)
"Razer" Deathadder (\$24) they show up as software in Razer's own game. They may be counterfeit replicas or unauthorized authentic. https://www.electrosmash.com/store/27050	Netat N5305 SSD I've seen benchmarks from 200/170 to 450/420 R/W, would say you can expect somewhere around 480/380 R/W	BaoFeng UV-R5 (\$24-\$30) These radios are perfect for someone who wants to replace the stock antenna on their radio. If you've upgraded alternatives from Baofeng, but then you partly lost the original antenna, you can still use the one on the internet.	BaoFeng UV-5R (\$24-\$30) Baofeng makes dirt-cheap rugged radios. These radios are perfect for someone who wants to replace the stock antenna on their radio. If you've upgraded alternatives from Baofeng, but then you partly lost the original antenna, you can still use the one on the internet.	JRC H22 (\$20)	XK Alien 250 (\$35)	James Donkey 112S (\$11)	James Donkey 125M (\$20)

Electronics putting the /g/ back in /csg/

Arduino/Funduino Nano/Pro Mini/Micro (\$1-\$5) 	RT-LSDR (\$7-\$15) RT-LSDR is a very cheap software defined radio. It's based on the RTL2832U chip and can be used as a computer-based radio scanner. This sort of scanner capability would have cost hundreds or even thousands of dollars just a few years ago... R820T2 is currently the recommended dongle. (rtlsdr.com)	NodeMCU ESP8266 (\$6) An open source firmware kit that helps you to prototype with a few lines of code. (nodemcu.com)	zsun Wifi Card Reader (\$11) The zwifi Card Reader is an embeded module that can serve wireless. It can be used to connect to a wireless network. It's a great way to add wireless support to your device. The device's main downside is in comparison to its compact size.	M328 Digital Transistor Tester (\$13-\$21) you plug in components and the device shows information about those components.	YIHUA 908D (\$22-\$29) A cheap temperature controlled soldering iron with standby mode. Should be your first choice if you're a hobbyist or if you're a pro.	Generic 48V Phantom Power Supply (\$19) These are typically cheaper on Amazon and provide phantom power to almost all condenser microphones.	Orange Pi Single Board Computers
